OBJECTIVE

Flutter Developer with experience in mobile application development, seeking to further enhance my expertise in building scalable and maintainable applications while contributing to impactful software projects.

EDUCATION

Bachelor of Computer Engineering

University of Phayao

Graduated in 2025 GPAX : 2.96

GRADUATION PROJECT

Tracking Student Attendance via Bluetooth Beacon

- Developed a mobile and web application to automate student attendance tracking
- Implemented features including attendance review, document submission, notifications, leave management, and analytics
- Designed user-friendly UI for both students and teachers
- Integrated ESP32 microcontroller with Bluetooth Beacon technology to enable automated attendance check-ins based on proximity
- Built the mobile application using Flutter and used MySQL for backend data storage

Technical Skills

Programming Languages: Dart, C, C#, C++, Java, Javascript, SQL, Node.js

Frameworks & Libraries: Flutter, WPF, Selenium

State Management: Provider, Riverpod

Tools: Git, GitLab, Sourcetree, Selenium, Visual Studio, VS Code, WAMP Server, Android Studio, Arduino IDE, MySQL Workbench, MySQL

ACTIVITIES

Police Care Application Launch Event

- Participated in the Police Care application launch event at CentralWorld as part of the development team

TESA Top Gun Rally #16 – Participant

- Participated in a competitive engineering innovation camp organized by TESA, focusing on teamwork, technology problem-solving, and real-world project development.

GRADUATION POPULAR VOTE

- Graduation Project: Student Attendance Tracking System using Bluetooth Beacon Received Popular Vote Award at ICT Open House 2024 (University Exhibition)

EXPERIENCE

Open-Source Contributor

2025 - Present

- Published 2 packages on pub.dev

Application Developer

Songkhla Finishing Co., Ltd | July 2025 – Present

Police Care (Royal Thai Police)

- Designed end-to-end UI, including application icon and marketing screenshots for Google Play Store and App Store
- Developed a Flutter-based mobile application to improve public access to police services (MVVM, Provider)
- Collaborated with cross-functional teams to deliver high-quality applications on time

One Police (Royal Thai Police)

- Implemented application features based on business requirements
- Revamped the application, improving UI/UX and overall functionality
- Refactored the codebase using structured state management, improving maintainability
- Consolidated multiple applications into a unified platform, reducing complexity and enhancing usability

Software Developer

PromptNow Co., Ltd. | Oct 2024 – Feb 2025

Desktop Applications (ibank)

- Designed and developed desktop applications using WPF (C#)
- Developed tools for network configuration management, port configuration, and Windows Event Log export
- Created comprehensive user manuals to support application usage and maintenance

QA/Test Engineer

- Developed automated test scripts using Selenium to improve testing efficiency
- Conducted manual and automated testing for BackOffice systems
- Performed hardware and software testing on VTM machines and reported defects
- Created and maintained test cases and test documentation

Web Application

- Developed features for the BackOffice web application based on business requirements
- Performed system validation and ensured application stability and performance
